

MEDICAL SCHOLARS PROGRAM  
MD/PHD  
UNIVERSITY OF ILLINOIS  
COLLEGE OF MEDICINE AT URBANA-CHAMPAIGN

# *The Future of Medicine Begins Here*

Interactions between Computer Science and Healthcare are producing a vital and exciting discipline whose intellectual leaders are MD/PhDs. The University of Illinois offers a unique program called the Medical Scholar's Program (MSP) that enables qualified students to earn a PhD in a discipline of their choosing and combine this with earning an MD. The program has over 150 students pursuing graduate study in over 30 academic disciplines. The MSP is now actively seeking applicants who wish to participate in research in computational biology or clinical informatics as a PhD student in CS.

Applicants must meet the admission criteria for the CS PhD program, the College of Medicine, and the MSP. This joint degree is available only to U.S. citizens and permanent residents.

## *Become a PhD in CS and a Medical Doctor*

Students begin their program of study in their graduate departments. MD training is integrated with graduate training in subsequent years. *MSP students in good academic standing and progressing toward completing both degrees receive a stipend and tuition waiver.*
